

## ALtop® 140

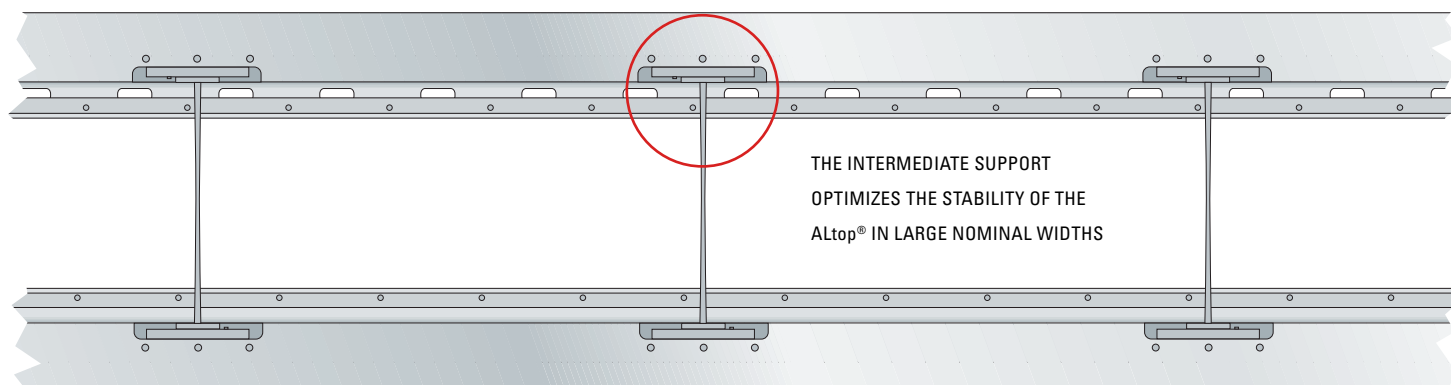

### PROGRESS IN ALUMINUM

**High-performance heald frame ALtop® –  
now also with 140 mm aluminum profile**

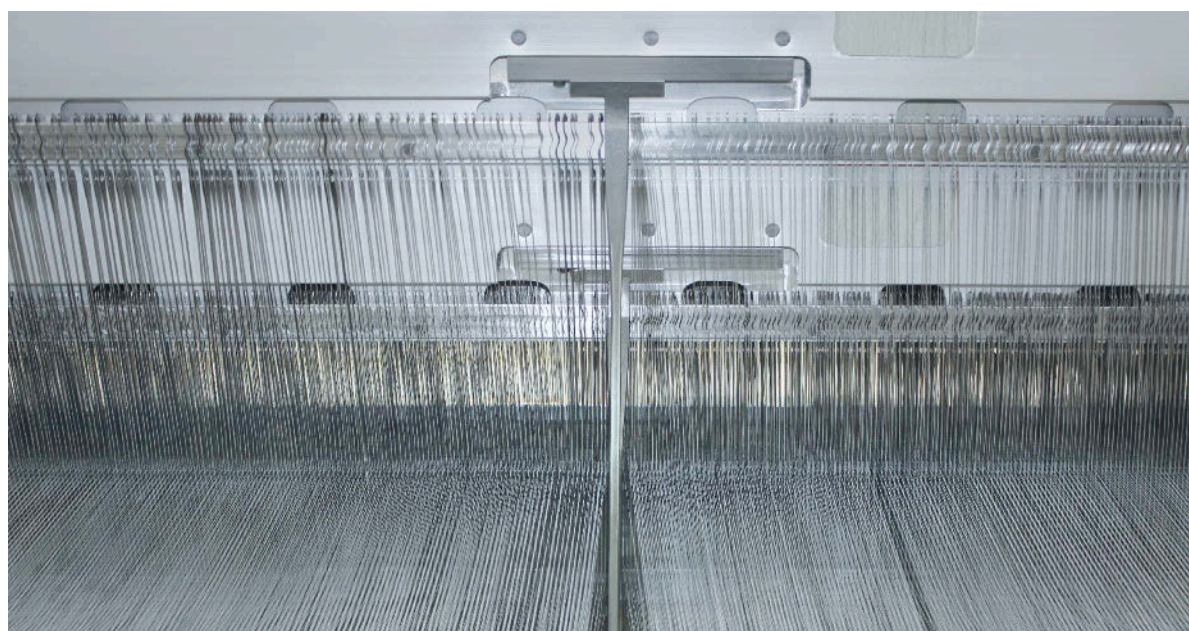

- Higher performance intermediate support
- Reduced wear – no synthetic components
- Increased service life

## BENEFITS WITH THE ALtop® 140

The diverse Groz-Beckert heald frame assortment has been enhanced by the ALtop® heald frame with 140/9 mm aluminum profiles. Its sturdy, high-performance corner connections with steel supports utilizes no synthetic components, reducing wear.

The patented technology of the ALtop® 140 incorporates a newly-designed intermediate support that features a steel-to-steel clamping system that eliminates support contact with aluminum profiles. The result is a significantly longer service life for the heald frame.

QUALITY THAT DELIVERS  
A COST-EFFECTIVE AND  
EXTENDED USEFUL LIFE
